17.05 – 17.10: Take Aways

“ **HELENA ULLGREN:**

The challenges in cancer care during the covid-19 pandemic, and how we started a nurse-led triage and transformed our outpatient clinic. I will bring up aspects of how to keep patients minimally exposed and feeling safe when visiting the hospital for treatment, and the challenges of symptom management. I will also share preliminary data from a study and quality improvement project, with cancer, hospitalized due to covid-19 and what we learned. ”

“ **LISA VILLABONA:**

What is known about COVID 19 (and other) vaccinations with cancer patients. Mostly we don't know much about the effects of COVID 19 vaccines with cancer patients, but we know a lot more about other vaccines with cancer patients. I will discuss the different cancer treatments and in which way they may affect the effect of vaccines. ”

Deadline for registration: **Monday, May 17th 2021**
Accreditation will be requested for the Netherlands
